

Roch Danistan Antonyrasan

Jaffna, Sri Lanka

Phone: +94 778679549 Email: rochdanistan123@gmail.com LinkedIn: roch-danistan 

Profile

Senior Software Engineer experienced in designing, developing, testing, and deploying software solutions across healthcare, telecommunication, and warehouse inventory management domains. Skilled in building scalable applications using Java, Spring Boot, React, Angular, PostgreSQL, AWS, Docker, and CI/CD practices. Experienced in both microservice and monolithic architectures, RESTful API development, cloud deployment, batch processing, and Agile software delivery. Strong analytical mindset with proven ability to collaborate with stakeholders, translate business requirements into technical solutions, and deliver reliable software products in deadline-driven environments.

Education

Master of Science in Computer Science **Expected Jan 2027**

University of Moratuwa, Sri Lanka

Specialization: Software Architecture

B.Sc. Special in Computer Science and Technology **Sep 2021**

Uva Wellassa University of Sri Lanka, Badulla

G.C.E. Advanced Level **Jul 2014**

St. Patrick's College, Jaffna

Results: B Passes for Mathematics and Physics, C Pass for Chemistry

G.C.E. Ordinary Level **Jan 2015**

St. Patrick's College, Jaffna

Results: 5A, 3B, C — English Medium

Work Experience

Senior Software Engineer **Nov 2024 – Present**

EV Technologies Pvt. Ltd. — Deputed at Sysco Labs

- Designed and developed the Aged and Obsolete inventory management project, helping warehouse teams track aged items and optimize item handling.
- Engaged directly with stakeholders to gather requirements and convert them into technical specifications and architecture diagrams.
- Designed and developed scalable RESTful APIs using Spring Boot.
- Built responsive frontend interfaces using React and integrated them with backend services.
- Deployed services on AWS Fargate and developed batch applications and AWS Lambda functions for asynchronous and event-driven processing.
- Wrote unit tests using JUnit for Java services and Jest for React components.
- Participated in Agile ceremonies, development, code reviews, testing, and deployment processes.

Software Engineer **Dec 2021 – Nov 2024**

Cloud Solutions International Pvt. Ltd., Colombo

- Designed and developed VIDA, a smart healthcare product using Java Spring Boot, Angular, PostgreSQL, and cloud services.
- Worked on healthcare modules including pharmacy management and prescription handling.
- Gained hands-on experience in microservices architecture, Apache Kafka, Redis, PostgreSQL, and cloud-based application development.
- Worked with cross-functional teams in an Agile delivery environment.
- Managed releases, maintained the codebase, and ensured timely delivery of assigned tasks.

Software Engineer Intern

Nov 2020 – May 2021

Digiratina Technology Solutions Pvt. Ltd., Colombo

- Worked on full-stack development projects using Spring Boot, Angular, PostgreSQL, and cloud services.
- Developed frontend features using Angular and backend REST APIs using Spring Boot.
- Contributed to project management and attendance tracking systems.

Skills

Programming Languages: Java, JavaScript, PHP, HTML

Frontend Technologies: ReactJS, Angular, Bootstrap

Backend Technologies: Spring Boot, RESTful APIs, Microservices

Cloud and DevOps: AWS, AWS Lambda, AWS Fargate, Docker, Jenkins, CI/CD

Artificial Intelligence: Generative AI, Retrieval-Augmented Generation (RAG), Prompt Engineering, LLM Integration, AI Chatbot Development

Databases: PostgreSQL, MySQL

Cloud and DevOps: AWS, AWS Fargate, AWS Lambda, Docker, Jenkins

Testing: JUnit, Jest

Projects

Item Lifecycle Management — Aged and Obsolete Inventory System **Sysco Labs**

Designed and implemented a system to detect, categorize, and track aged and obsolete warehouse inventory items. Developed dashboards with filtering by site, vendor, item category, and aging status to support supply chain decisions such as reallocation, markdowns, and disposal.

VIDA — Smart Healthcare Product **Cloud Solutions International**

Worked on the pharmacy module of VIDA, a healthcare platform that manages hospital pharmacy operations. The module handles patient prescriptions, medication issuing, and end-to-end pharmacy workflows.

MediBot – AI Healthcare Assistant

Developed an AI-powered healthcare chatbot capable of assisting users with disease awareness and medication-related guidance. Implemented Retrieval-Augmented Generation (RAG) architecture to retrieve relevant medical knowledge and generate context-aware responses using Large Language Models (LLMs). The system provides disease explanations, medication information, and intelligent conversational support while improving response accuracy through document retrieval mechanisms.

Project Management System **Digiratina Technologies**

Worked as a full-stack developer on a system used to manage company projects and employees. Developed frontend features using Angular and backend APIs using Spring Boot.

Attendance Tracking System **Digiratina Technologies**

Worked as a backend developer on a system used to track employee attendance and manage leave records. Developed and maintained REST APIs using Spring Boot.

Aspect-Based Sentiment Analysis of Mobile Phone Reviews **Final Year Project**

Developed a research project focused on aspect-based sentiment analysis of Amazon mobile phone reviews.

Flutter Mobile Application for Online Pharmacy **Undergraduate Project**

Developed a mobile application that allows customers to order and purchase medicines online.

Mobile Application for Online Bus Seat Booking **Undergraduate Project**

Developed a mobile application for booking seats for the Jaffna to Badulla bus service.

Food Ordering and Table Reservation System

Undergraduate Project

Developed a web application to manage food orders and restaurant table reservations.

Certifications

AWS Academy Graduate — AWS Academy Microservices and CI/CD Pipeline Builder

AWS Academy Graduate — AWS Academy Data Engineering
